• Weight empty	32kgs	• Compliance	
• Weight full	387kgs		AS1742-3-1996 Traffic Control Devices for works on roads, Section 3.10.1(C)
• Water fill to top	355 litres		
• Joining System	Interlocking		

The Industroquip **Heavy Duty Water Filled Barrier** has been specifically designed as a low speed (20k/m) zone barrier. Its simple **interlocking system** allows barriers to remain connected while moving through 120 degrees each way.

The barriers are fitted with retro reflective tape and have two apertures topside for fitting of hazard warning lights, pole signage or extended mesh fencing.

The barrier also complies with Australian Standards AS1742-3-1996 Traffic Control Devices for works on Roads, Section 3.10.1(C).
